WATERLOO, ON

Undergraduate student in pure mathematics and computer science with a strong foundation in real analysis, logic, and algebra. Experienced in teaching, independent projects, and full-stack development through multiple co-op placements. Eager to contribute to mathematical research while expanding theoretical depth and problem-solving expertise.

EDUCATION

University of Waterloo | *GPA: 88.00* *2022 – Expected 2027*
Bachelor of Mathematics | *Joint Computer Science and Pure Mathematics* *Waterloo, ON*

SKILLS

Tools and Environments: L^AT_EX, Typst, Git, Vim

Programming Languages: Python, C/C++, JavaScript/TypeScript, C#

TEACHING

Mathematics Tutor *May 2024 – August 2024, January 2025 – April 2025*
University of Waterloo Math Tutoring Centre *Waterloo, ON*

- Provided drop-in tutoring support for undergraduate algebra courses: MATH 135, 136, and 235.
- Helped students work through problems, clarify concepts, and understand proof-based material.

EXPERIENCE

Software Engineer Co-op (Hybrid) *May 2025 – August 2025*
Constant Contact Inc. *Kitchener, ON*

- Contributed to the development and maintenance of production systems related to email delivery.
- Implemented new features, fixed bugs, and wrote unit tests as part of an agile development team.
- Collaborated through code reviews, sprint planning, and issue tracking using tools like Jira and Git.

Full-stack Developer Co-op (On-site) *September 2024 – December 2024*
BCS Automation Ltd. *Belleville, ON*

- Designed and trained unsupervised models to detect irregular patterns in time-series data.
- Developed data pipelines and querying infrastructure to support large-scale numerical analysis.
- Built tools for interactive data exploration to aid in investigation and interpretation of anomalies.

Full-stack Developer Co-op (On-site) *January 2024 – April 2024*
BCS Automation Ltd. *Belleville, ON*

- Improved performance of large-scale data systems through redesign of storage and indexing strategies.
- Enhanced system reliability and access control through integration of secure authentication protocols.
- Refactored application infrastructure to support modular design and long-term maintainability.

Application Support Analyst Co-op (Hybrid) *May 2023 – August 2023*
Home Hardware Stores Ltd. *St. Jacobs, ON*

- Diagnosed and resolved network and application issues across 1100+ retail locations nationwide.
- Supported infrastructure upgrades to POS systems and endpoint devices, improving reliability.

RELEVANT COURSEWORK

Completed

- PMATH 351: Real Analysis
- MATH 235: Linear Algebra 2
- CS 245: Logic and Computation
- CS 241: Foundations of Sequential Programs (Compilers)
- CS 240: Data Structures
- MATH 239: Introduction to Combinatorics
- CO 250: Introduction to Optimization

Planned by January 2026

- PMATH 347: Groups and Rings
- PMATH 367: Topology
- CS 360: Theory of Computing
